DETAILED ACTION

Response to Amendment

1. Amendment filed January 5, 2004 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "top surface" and "bottom surface" recited in claims 10 and 31 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

4. Claims 10-14, 31-34 and 36-38 are objected to because of the following informalities: claims 10 and 31 refer to "top" and "bottom" surfaces while the specification, in the detailed description, utilizes "front" and "rear" surfaces. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 10-14 and 36-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The disclosure as originally filed does not disclose "each aperture is defined by a generally conical cavity which extends from the bottom surface toward the top surface and a dome shaped cavity that extends from the top surface toward the bottom surface." The specification nor the drawings disclose a "generally conical cavity" and a "dome shaped cavity." The terms "conical" and "domed" appears in the specification to describe the island 32 of mandrel 26 on page 12, line 15.

Claim Rejections - 35 USC § 103

7. Claims 31-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Humberstone et al. (5,518,179) in view of East (3,550,864).

Humberstone et al. discloses the limitations of the claimed invention with the exception of the concave geometry. East teaches a concave geometry from D_t to D_E . It would have been obvious to a person having ordinary skill in the art at the time of the

invention to have provided a concave geometry to the aperture plate of Humberstone et al. as taught by Hindman to improve efficiencies during operation with a two phase mixture (East, column 1, lines 20-25).

Response to Arguments

8. Applicant's arguments filed January 5, 2004 have been fully considered but they are not persuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

In response to applicant's argument that, in aperture plate of claim 31, "liquids are placed into contact with the convex portion and are then moved th[r]ough the conical portion where they are ejected," applicant's argument is not commensurate in scope with the claimed invention. The extreme breadth of claim 31, as presently written, is not limited to liquid entering into a convex portion and then moving through a conical portion.

9. Applicant's arguments with respect to claims 10-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
